

MEGHRAJ KHANAT

Software Engineer
Pune, Maharashtra, India

Phone: +91 8530072969 | Email: khanatmeghraj0@gmail.com | LinkedIn  | GitHub  | Portfolio 

Professional Summary

Computer Science graduate and aspiring **Software Engineer** with hands-on experience developing full-stack web applications using **JavaScript, React.js, Node.js, Express.js, and MongoDB**. Strong understanding of **REST APIs, database integration, Git, SDLC, and Agile development** through academic and team-based projects. Familiar with **AWS, Docker, Kubernetes, Terraform, CI/CD, and Linux**, with experience deploying applications and working with cloud environments. Strong problem-solving skills with a passion for learning new technologies and building reliable, user-focused software solutions

Education

- B. Tech in Computer Science, Vidya Vikas Pratishthan Institute of Engineering & Technology, Solapur — June 2026 — 7 CGPA

Technical Skills

- **Programming:** Python, JavaScript, Bash, SQL
- **Frontend Development:** HTML5, CSS3, JavaScript, React.js, Bootstrap, Tailwind CSS
- **Backend Development:** Node.js, Express.js, RESTful APIs
- **Databases:** MongoDB, MySQL, MariaDB
- **Cloud & AWS:** AWS (EC2, S3, RDS, IAM, VPC, CloudWatch, Route 53, Lambda, CloudFormation)
- **DevOps:** Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Ansible
- **Version Control & Tools:** Git, GitHub, Visual Studio, Linux, Nginx

Work Experience/Projects

Movie Ticket Booking System (MERN Stack: MongoDB, Express.js, React.js, Node.js)

- Developed a full-stack application for user sign-up, movie exploration, seat selection, and ticket booking.
- Implemented real-time seat availability and booking functionality, improving user experience.
- Collaborated with a team of 4, handling frontend, backend and database integration.
- Optimized MongoDB queries, which enhanced booking speed and system performance by 20%.

E-Commerce Website (MERN Stack: MongoDB, Express.js, React.js, Node.js)

- Built a full stack web application with authentication, product catalog and order management for 500+ users.
- Integrated search, filter, and sorting features, enhancing product discovery and user satisfaction.
- Optimized backend performance with MongoDB and Express.js, reducing page load time by 25%.
- Collaborated with team members to deploy the application on cloud services (AWS) for testing & deployment.

AWS 3-Tier Web Application Architecture

- Designed and implemented a secure 3-tier architecture on AWS consisting of Web, Application, and Database.
- Created a custom VPC with public and private subnets across multiple availability zones.
- Installed Configured Internet Gateway and NAT Gateway for secure internet access and outbound connectivity.
- Deployed EC2 instances for web and application servers with appropriate Security Group rules.

Achievements

- Completed coding challenges on GeeksforGeeks and LeetCode, strengthening problem-solving skills.
- Won the college-level cricket tournament as part of the team, demonstrating leadership and teamwork.

Certifications

- Python for Data Science – Coursera

Languages

- English — Hindi — Marathi.
